◆ Moon sign: a reflective lens on your decision

Kumbha Moon: emotional clarity is traditionally supported by independence, purpose and room to think differently. A likely strength to test in your real history is seeing systems, networks and future possibilities; the counter-pattern to watch is becoming emotionally distant while solving the problem intellectually.

- ◆ CALCULATED ANCHOR - Moon sign (Rashi): Kumbha. Source: Golden Kundli local calculation engine.
- ◆ APPLICATION TO YOUR QUESTION - Use the theme of independence, purpose and room to think differently to ask which real option supports your needs. Check the counter-pattern of becoming emotionally distant while solving the problem intellectually against an actual example; do not assume it describes you.
- ◆ This is traditional interpretation, not independently established biography or a forecast.

◆ Birth star: a second theme to compare

Shatabhisha Nakshatra: its reflective motif is independent inquiry, systems and healing symbolism; the discipline is to avoid withdrawing when dialogue is needed. Check this against repeated choices in your own records rather than accepting it as a fixed trait.

- ◆ CALCULATED ANCHOR - Birth star (Nakshatra): Shatabhisha. Source: Golden Kundli local calculation engine.
- ◆ APPLICATION TO YOUR QUESTION - Compare this symbolic theme with one repeated pattern you have observed and one example where it does not fit. No event or fixed trait is inferred.

- ◆ This is traditional interpretation, not independently established biography or a forecast.

◆ Teaching or administration: compare the work, not just the title

Your question: "I am considering a change from teaching to administration. How can I reflect on it without neglecting family time?".

This is a choice between different daily responsibilities. Classroom work and administration can draw on overlapping skills, but the balance of student contact, people management and accountability changes. Your chart cannot establish which role you will enjoy or whether an employer will appoint you.

- ◆ Compare a normal week in each role: time with students, meetings, paperwork and staff support. Ask someone doing the actual role rather than relying on its title.
- ◆ List two examples of leading colleagues and two examples of classroom work you want to keep. Use those examples to identify what you would gain and miss.
- ◆ Check the required qualifications, hours, compensation and probation conditions with the employer. These facts are not derived from astrology.
- ◆ NEXT STEP - Request a conversation with a practising administrator and one short shadowing opportunity. Write down what you learned before committing to a change.
