Fictional public example - free preview

Mira Sen (fictional example)

Prepared 20 October 2026 UTC

Your first two name options: a worked comparison

At a glance: Mira Sen: 21 total, 3 reduced; Meera Sen: 30 total, 3 reduced. This local Chaldean comparison ignores spaces, apostrophes and hyphens; 11, 22 and 33 remain unreduced. The letter sums follow. A higher total is not a better name or a forecast. 4 further submitted option(s) are outside this preview. Choose by meaning and everyday use.

- ◆ “Mira Sen”: $M=4 + I=1 + R=2 + A=1 + S=3 + E=5 + N=5$.
Total 21; reduced result 3.
- ◆ “Meera Sen”: $M=4 + E=5 + E=5 + R=2 + A=1 + S=3 + E=5 + N=5$. Total 30; reduced result 3.

Your submitted spellings: letter totals

Calculated using the stated Chaldean mapping. Longer bars are larger arithmetic totals, not better names or better outcomes.

Bars share a zero baseline. The displayed numeric value for each bar is printed beside its label.

What your name numbers symbolize

These themes paraphrase Cheiro's single-digit numerology. If a result is 11, 22 or 33, Golden Kundli preserves it under a different declared rule; a digit-root reading is separate. Use these as discussion prompts, not traits or forecasts.

- ◆ Mira Sen (3): In Cheiro's modern numerology, 3 is linked with ambition and order. Does the full spelling support the purpose you have in mind while staying easy to use?

- ◆ Meera Sen (3): In Cheiro's modern numerology, 3 is linked with ambition and order. Does the full spelling support the purpose you have in mind while staying easy to use?

What changed between the spellings?

Comparing “Mira Sen” with “Meera Sen”: the letter total changes by +9. Both reduce to 3, so the reduced number does not distinguish these spellings.

- ◆ Read both aloud with the intended surname or business descriptor. Ask someone to repeat and spell them without coaching.
 - ◆ Choose the spelling you can use consistently. A numerical difference alone is not a reason to alter official documents.
