ASTROLOGICAL & VEDIC GUIDANCE

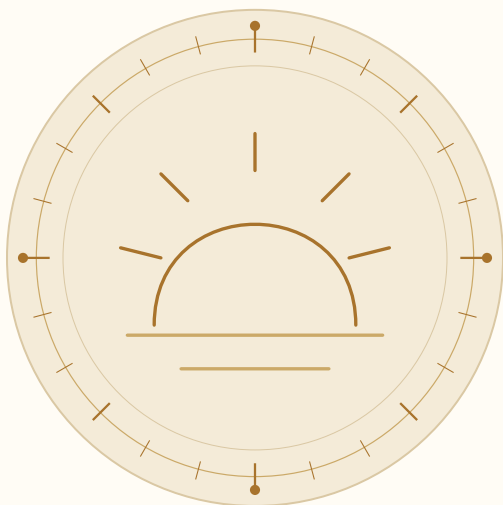

FREE INSIGHT PREVIEW

Personal Panchang & Daily Timing

Fictional public example - free preview

Mira Sen (fictional example)

Prepared 20 October 2026 UTC

Your requested day and place

These are the details submitted for this day guide. They are request answers, not calculation results or a verified location record. Check the activity's location before continuing.

- ◆ Requested local date:
2026-10-15
- ◆ Requested local evaluation time: 12:00
- ◆ Requested place: Calgary, Alberta, CA
- ◆ Requested time zone: America/Edmonton

Daily Panchang - a limited free preview

Panchang factors, sunrise, sunset and Hora windows have not been calculated in this free preview.

The selected local date, evaluation time and city below record your request; they are not an auspicious-time result. Your birth date and birth time are not needed for this day-and-location guide.

What the day guide helps you read

Tithi describes the lunar-day phase, Nakshatra the Moon's star division, Yoga a Sun-Moon combination and Karana a half-Tithi division. Their returned values and ending times depend on the chosen day and location. Hora divides the day into traditional planetary-hour windows; the complete report labels its fixed-hour convention.

- ◆ Check the selected local date, evaluation time and city below. Use the place where the activity will happen; do not substitute your birthplace.
- ◆ Read a complete report's local-date labels, time zone and UTC offsets before comparing windows. Never assume a time shown for another city applies to yours.
- ◆ One useful next step: confirm your activity's practical constraints and a backup time. This guide does not select a personal ceremony Muhurat or guarantee an outcome; check important observances with your temple.
