PERSONAL GRANTH

Sade Sati Granth

Fictional complete report example

Anaya (fictional)

Prepared 15 October 2026

Language: English

Read this sample first

FICTIONAL LAYOUT SAMPLE.

Names, birth details, chart positions, scores, and dates below are invented for display testing. They are not an independently calculated personal report or a prediction.

Your results - the short version

Sade Sati here means Saturn's sign is compared with the natal Moon's sign and its two neighbours. On 2026-10-15, Saturn is inside that span. This is not a forecast of hardship.

SAVED STATUS ON 2026-10-15

Saved status on 2026-10-15:
inside the declared Sade Sati
span.

NATAL MOON SIGN

Natal Moon sign: Leo.

REFERENCE-DATE SATURN SIGN

Reference-date Saturn sign:
Cancer.

Where to look next

CALCULATED

On 2026-10-15, the Moon sign is
Leo and Saturn's sign is Cancer;
Saturn is inside the three-sign
Sade Sati span.

TRADITIONAL READING

The phase is a sign position, not a forecast of harm.

EXAMPLE

An illustrative family lists real care tasks and support.

YOUR NEXT CHECK

Confirm the birth input and saved date; exact entry and exit dates are not supplied.

Find the full evidence: Read the three-sign diagram and count from your natal Moon to the saved Saturn sign. This current-status result provides no dated entry, exit or retrograde-return series and does not predict misfortune.

Your question, in your own words

Prepared for Anaya (fictional).

Question: How should I reflect on my current responsibilities?

Keep this question in view as you read the calculated result and decide what to check in daily life.

For the decision you described

Keep the question above in view; no predefined topic has been assigned to it. These themes come from your request, not a concern discovered from a chart.

This status can answer whether that date falls in the declared sign span. It cannot explain the cause of your concern or supply an entry or exit date without a dated transit series.

Facts to check before deciding:

- ◆ On 2026-10-15: natal Moon Leo; returned Saturn Cancer.
- ◆ Your saved status is inside the three-sign span; phase: Approaching the Moon sign.
- ◆ Next fact to confirm: What is happening now that you would like help understanding, and which part is an observed fact rather than a feared outcome?

CHAPTER 01

Your Sade Sati status - plainly stated

Reference date: 2026-10-15.
Source: the saved calculation
source. Natal Moon sign: Leo.
Returned Saturn sign: Cancer.
Status under the three-sign rule:
within the Sade Sati span. Phase:
Approaching the Moon sign.

This is a comparison of signs, not
a warning that something bad will
happen. It does not establish a
seven-and-a-half-year block of
uniformly difficult experiences,

and it is not a diagnosis or a prediction of loss.

In this chapter

See the three-sign rule for your result

How the status was checked

What your phase does - and does not - mean

Do not turn a timing label into fear

A practical review for the question you asked

Dates and advanced results not claimed

See the three-sign rule for your result

For your natal Moon in Leo, the three-sign span is Cancer, Leo and Virgo. Saturn is in Cancer on 2026-10-15, inside that span.

Counting forward from Saturn's saved sign to the natal Moon sign takes 1 sign transitions. This is a position count, not years or months remaining.

The shaded cells identify the span; the labels identify the two returned signs. No exact within-sign degree or entry date is implied by this diagram.

Natal Moon and reference-date Saturn

Shading = the sign before the Moon, its own sign, and the sign after it. Sign categories only; no exact longitudes are plotted.

Pale: Can/Leo/Vir span; gold: Moon sign; dark: Saturn sign. Signs only.

Graha	Saved sign
Moon	Leo (sign 5)
Saturn	Cancer (sign 4)

Ari: Aries; Tau: Taurus; Gem: Gemini;
Can: Cancer; Leo: Leo; Vir: Virgo; Lib:
Libra; Sco: Scorpio; Sag: Sagittarius;
Cap: Capricorn; Aqu: Aquarius; Pis:
Pisces

How the status was checked

The declared rule compares the saved natal Moon sign with Saturn’s returned sign for the reference date. The preceding sign, the Moon sign itself and the following sign form the three-sign span. The returned boolean must agree with that sign comparison.

A sign comparison does not calculate exact entry, exit or retrograde re-entry dates. Those require a dated transit series and clearly specified settings. This edition must not substitute an approximate age or a generic seven-and-a-half-year duration for your actual transit boundaries.

What your phase does - and does not - mean

The calculation labels the phase as "Approaching the Moon sign". That label describes Saturn's relative sign position. It does not tell us whether you are in danger, whether a family member will

suffer, or whether a purchase is necessary.

Question: How should I reflect on my current responsibilities?

Separate that concern into what is happening now, what is uncertain and what you can do next. Ordinary support, sensible planning and professional advice remain relevant whether the calculated status is active or inactive.

Do not turn a timing label into fear

No paid ritual, gemstone or further report is required to make this status safe. Optional devotional practice may be

meaningful because of faith or routine; this report does not claim that it controls planetary motion or guarantees an outcome.

If the label makes you anxious, pause the reading. Ask what concrete evidence exists for the feared event. A cultural timing concept is not evidence that a harmful event is about to occur.

A practical review for the question you asked

Question: How should I reflect on my current responsibilities?

List the commitments already on your calendar and the support available to you. If a

responsibility is too large, consider an ordinary adjustment: a clearer schedule, a conversation with family, or qualified advice. None of those steps requires waiting for Saturn to change signs.

Do not postpone medical care, legal deadlines or essential financial decisions because of a Sade Sati label. Use the appropriate real-world information for the decision.

Dates and advanced results not claimed

This current-status result does not contain a verified lifetime Sade Sati timeline, exact entry

and exit times, Shadbala, Bhavabala or a personal outcome forecast. A chart of exact phases may only be added after the underlying transit calculations are present and independently checked.

The absence of those results limits this edition. It must not be disguised as a complete long-form transit analysis by repeating general advice across additional pages.

CHAPTER 02

Count the signs yourself

Start with your natal Moon sign Leo as number 1, then count forward to the returned Saturn sign Cancer. The result is 12 from the Moon.

Under the declared whole-sign rule, only counts 12, 1 and 2 fall within Sade Sati. Your count of 12 is inside that set. This depends on the saved natal Moon sign, reference-date Saturn sign and zodiac convention - not the

account holder's display name or the city where your relatives live.

The list makes the rule inspectable. An independent check must still verify the underlying Moon and Saturn signs.

- ◆ 1 from the Moon: Leo - part of the three-sign span.
- ◆ 2 from the Moon: Virgo - part of the three-sign span.
- ◆ 3 from the Moon: Libra.
- ◆ 4 from the Moon: Scorpio.
- ◆ 5 from the Moon: Sagittarius.
- ◆ 6 from the Moon: Capricorn.
- ◆ 7 from the Moon: Aquarius.

- ◆ 8 from the Moon: Pisces.
- ◆ 9 from the Moon: Aries.
- ◆ 10 from the Moon: Taurus.
- ◆ 11 from the Moon: Gemini.
- ◆ 12 from the Moon: Cancer -
returned Saturn sign - part of
the three-sign span.

CHAPTER 03

The two inputs that decide this saved status

Anaya (fictional)'s saved natal Moon sign is Leo. The saved reference-date Saturn sign is Cancer. Counting the Moon sign as 1 places Saturn at count 12. Only counts 12, 1 and 2 are included in the declared whole-sign Sade Sati rule. This is why this edition records the status as inside the three-sign span on 2026-10-15.

The Moon sign is a natal input. The Saturn sign belongs to the consideration date. Substituting today's Moon sign, the Sun sign or an ascendant sign would change the question being calculated. Likewise, a current Saturn placement must not be presented as its placement at birth.

The familiar phrase "seven and a half years" is an approximate description of passage through three signs, not a precise start-to-finish duration returned by this status response. A current yes/no status does not say when the first entry happened, how many retrograde returns occurred or when the final exit will happen.

This distinction is particularly important if somebody has told you that a difficult event must have been caused by Sade Sati. The two sign labels establish the status under the rule. They do not establish the cause of an event, its severity, the person's resilience or the outcome of a decision.

In this chapter

**Your three-sign map -
understand the phase names**

**If the natal Moon sign needs
checking**

Your three-sign map - understand the phase names

With a natal Moon in Leo, the preceding sign is Cancer, the Moon sign itself is Leo, and the following sign is Virgo. These three categories form the entire declared span. The saved Saturn sign Cancer is compared with that map; no second sign has been silently substituted.

"Approaching" labels the preceding sign, "in the Moon sign" labels the middle sign, and "following" labels the next sign. In this context the words name positions on the zodiac, not stages of emotional recovery or a

guaranteed rise and fall in difficulty. The middle label is not proof of the worst part of a person's life.

Saturn's apparent retrograde movement can take it back across a sidereal sign boundary. A proper dated sequence must therefore track entries and returns rather than assign three equal blocks of thirty months. The present status response contains neither that sequence nor the longitudes needed to calculate it.

If you revisit the topic later, compare a newly calculated consideration date with this saved date. Reopening this PDF

does not update the status. Keep an edition that was meaningful to you as a dated record, not as an indefinitely current alert.

If the natal Moon sign needs checking

The following is a deliberately hypothetical category-sensitivity check. It holds Saturn fixed at the saved Cancer and asks what the rule would return if the natal Moon sign were the previous, saved or next sign. These alternatives are NOT recalculated birth charts and are not estimates of your birth-time uncertainty.

Hypothetical adjacent sign: Moon Cancer; Saturn count 1; inside the span. Saved case: Moon Leo; Saturn count 12; inside the span. Hypothetical adjacent sign: Moon Virgo; Saturn count 11; outside the span.

This shows whether a disputed Moon-sign input could change the category. It cannot tell you whether your Moon really lies near a boundary. That needs the actual natal Moon longitude and a justified range of birth-time inputs. Close to a boundary, a small angular difference can change the sign label; it does not mean the Moon has moved a full thirty degrees.

If the label conflicts with a family chart, compare the recorded birth date, local birth time, timezone and sidereal convention first. Do not buy a remedy to resolve a data disagreement. A correct input check is the appropriate next step, and no unfavourable interpretation is inferred from uncertainty.

CHAPTER 04

Your saved details and report notes

Your question and next fact appear before Contents. The saved inputs, reading guide and calculation references are collected here so the result stays easy to find. Keep this record when comparing a later edition or asking for an input correction.

Calculation method and limits

Details used - Anaya (fictional)

Selected person 1: Anaya (fictional). These are the details frozen for this report. Editing your account later does not change this edition.

Birth date, time, place and time-zone settings can change a

birth-chart calculation. Name spelling identifies the person; it does not change the saved astronomical positions. Contact support to correct a source detail rather than buying the same report again to report an input error.

- ◆ Date of birth: 1990-06-15
- ◆ Birth time: 08:30
- ◆ Birth place: Kochi; country: India
- ◆ Birth time zone: Asia/Kolkata
- ◆ Current city: Toronto; current time zone: America/Toronto
- ◆ Mother tongue: Not supplied. Report language: English.

How to read this report

Start with the calculation summary, then the sections relevant to your question.

“Calculated” means a reproducible result from the named method. “Traditional” describes a cultural interpretation, not an established prediction. “Practical” means an optional step you can assess in ordinary life.

A result can be arithmetically correct without proving a claim about the future. A missing calculation is not an unfavourable result. No section asks you to buy a remedy to avoid harm.

A decision you can explain

Choose one fact to confirm next. Write down who can answer it and when you will review the answer. Take a small, reversible step before making a lasting commitment.

The next fact I will confirm:

The person or source I will ask:

My date to review the answer:

What this report does not claim

Astrology and numerology are offered here as cultural and reflective systems. Their interpretations do not establish that a relationship will succeed, a name will create wealth, an illness will occur, or a date will guarantee success. A favourable factor is not permission to ignore evidence. An unfavourable factor is not a reason for fear, stigma or discrimination.

Use qualified medical, legal, financial or counselling support where the decision calls for it. You remain free to disagree with an interpretation and to stop reading.

Calculation method and limits

The saved natal Moon and reference-date Saturn signs are compared under the stated whole-sign three-sign rule. This snapshot does not supply exact transit entry or exit times.

Traditional themes and practical suggestions are editorial explanations. Missing or unconfirmed calculations are

withheld; a printed result does not establish predictive accuracy.

About this public example

FICTIONAL LAYOUT SAMPLE.

Names, birth details, chart positions, scores, and dates below are invented for display testing. They are not an independently calculated personal report or a prediction.

CHAPTER 05

Your report, in everyday words

On 2026-10-15, the birth Moon sign is Leo and Saturn's sign is Cancer.

The three-sign rule places this comparison inside Sade Sati; the saved phase is "Approaching the Moon sign." Sade Sati names Saturn in the sign before, of or after the birth Moon. This is a dated sign comparison, not a grade for your life.

In this chapter

What those words mean

How the findings fit together

An everyday example

A useful next step and the limits

What those words mean

"Natal" means at birth; "transit" means a later position. A sign is one of twelve zodiac sections. The phase names Saturn's position relative to the birth Moon.

It does not count difficulties or predict a loss. Inside does not mean harm; outside does not promise an easy year.

How the findings fit together

The Leo Moon and Cancer Saturn signs produced this status. Check the birth details and reference date.

This one saved comparison does not include a verified series of every entry, exit or return. Do not infer an exact future change date from it.

An everyday example

Illustration, not a statement about you: someone caring for a relative lists tasks, helpers and dates to ask for support.

They can do this inside or outside the span. The list may show a practical request for today. The Sade Sati label cannot show whether family life will improve.

A useful next step and the limits

Name one concern and one source of help. A phase label is no reason to buy a remedy or make a fearful decision.

Recheck wrong-looking inputs. "Moon sign" is the birth Moon's sign; "Saturn sign" is Saturn's sign on the chosen date. Neither is a personal prognosis.

Save your own report

Your own purchased report appears in My Granths. This public example contains no personal reading or purchase entitlement.

Fictional public example. Not a personal prediction.
